Education

Vellore Institute of Technology- Master's of Tech Integrated in Computer Science and Engineering with specialization in Computational and Data Science Sept 2021 - May 2026
CGPA: 8.72/10

Technical Skills

Programming Languages: Java, Python, SQL.

Software Development: Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, Prompt Engineering, AI Agent Development.

AI & Data: Machine Learning, Generative AI, LLMs, RAG, Data Analysis, Data Visualization, Model Evaluation, Statistics.

Tools & Technologies: Git/GitHub, Streamlit, SQLite, FastAPI (Basic), Docker (Basic), Power BI, Looker Studio, Agentforce AI, Salesforce.

Certifications: IBM Machine Learning with Python, AI/ML with Python, Data Visualization with PowerBI.

Experience

OmniCloud Software Consulting pvt Ltd – Software Development Intern Jan 2026 – Present

- Developed 10+ enterprise application components using Lightning Web Components (LWC), Apex, and JavaScript to automate business workflows.
- Built and integrated 4+ AI-powered agents and prompt-driven solutions using Agentforce AI to streamline user interactions and business processes.
- Collaborated on application development, customization, and automation within the Salesforce ecosystem.
- **Tech Stack:** Salesforce, Apex, LWC, JavaScript, HTML, CSS, Agentforce AI, SOQL, Revenue Cloud Advanced.

Ozibook Tech Solutions - Data Analyst Intern Oct 2024 – Jan 2025

- Led analytics projects for 4 clients and mentored 15+ interns in data collection, analysis, visualization, and reporting.
- Developed 7+ dashboards and automated reporting workflows to improve reporting efficiency.
- Collaborated with stakeholders to gather requirements, analyze data, and communicate business insights.
- **Tech Stack:** Python, Power BI, Looker Studio, Google Sheets, Excel, LinkedIn Sales Navigator, Apollo.io.

Projects

FactCheckAI – LLM Claim Verification System [Ongoing]

- Developed an ensemble fact-verification system using transformer embeddings, linguistic features, machine learning, and deep learning models.
- Evaluated model performance on 26,171 claims to assess factual consistency, robustness, and hallucination risks.
- **Tech Stack:** Python, NLP, Machine Learning, Ensemble Modeling, HoVer Dataset.

StudentSmart AI-Natural Language Education Analytics Assistant [[GitHub-link](#)] Nov 2025 – Jan 2026

- Built a Streamlit application that converts natural language queries into SQL using Google Gemini.
- Enabled anomaly detection and interactive visualizations for educational datasets using SQLite and Pandas.
- **Tech Stack:** Python, SQL, Streamlit, SQLite, Pandas, Matplotlib, Google Gemini API.

Technical Activities

- Solved 396+ coding problems on LeetCode (218 Medium, 71 Hard).
- Solved 463+ coding problems on GeeksforGeeks, achieving Institute Rank 87 and a 303-day coding streak.
- Served as Treasurer of the Data Science Club, organizing DSA Dash and coordinating multiple hackathons and technical events.
